

Using Discovery Espresso

Discovery espresso can be used on a tablet or on a pc. Some functions do not work on a tablet. **Discovery espresso** works better through **Chrome**  than through **Explorer**. 

1. Go to www.discoveryeducation.co.uk
2. Click on **LOGIN** and select **Espresso**
3. Enter the username: **student23641**
4. Enter the password: **preston**

This screen may appear. If it does, click on the grey box

My services

5. You will be brought to the **home page** from where you can navigate to a wide range of resources.

6. At any point, clicking the **home** symbol or the word **Home** will return you to the home screen.

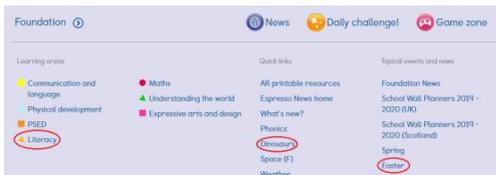

7. The **Foundation**, **Key Stage 1** and **Key Stage 2** tabs navigate to resources aimed at those children.

Foundation – Reception
Key Stage 1 – Years 1 and 2
Key Stage 2 – Years 3 to 6

If you **hover** the cursor over the phase you want, you will get a drop down menu.

If you **click** on the phase tab, it will look more like this.

You will see the same headings appear. You can navigate in either way.

8. **EYFS** resources are divided into seven learning areas. You click on the area you need and follow the given thread.

MATHS

1. Click on **Foundation**
2. Scroll down to and click on **Maths**

3. The screen will then look like this. We use this resource with the children in school and they will be familiar with most of the maths skills and ideas explored in each area.

 <p>Our pick: Shape Explore the properties of 2D and 3D shapes, as well as those of the patterns we see around us.</p> <p>Shape, space & measures</p>	 <p>Our pick: Numbers 0-20 Practise counting from 0-20 with everyday objects.</p> <p>Numbers</p>
 <p>Number Crew: Counting Use counting skills to solve problems.</p> <p>Numbers</p>	 <p>Number Crew: Writing numbers to 20 Learn how to read, write and order numbers from 0-20.</p> <p>Numbers</p>
 <p>People who help us (Content Club Archive) See a variety of people at work in their local areas and wider communities.</p> <p>Numbers</p>	 <p>Problem solving Videos and activities to develop skills that involve counting, sorting, matching and patterns.</p> <p>Shape, space & measures Numbers</p>

4. These areas of maths all form part of the Reception curriculum. By clicking on each heading, you can access a range of videos, activities, further resources and a learning review.

For example, if you select '**Numbers 0-20**', you will see this screen.

By clicking '**Videos**' you can watch some fun videos about numbers and counting. By clicking '**Activities**' you can access some interactive games. You can click the tabs at the top to select the types of activities you would like. The tabs are shown below.

If you click on **‘Further Resources’**, you’ll find some photos and worksheets which can be printed. The **‘Learning Review’** can be completed once you feel your child is confident at the activities and has mastered the necessary skills.
